Caverion delivers building systems for a shopping center in Germany

Caverion delivers building systems for a shopping center in Bottrop, Germany. Caverion's technical installation work will cover the disciplines of Ventilation & Air Conditioning, Heating & Sanitation, Cooling, and Security & Safety. After a comprehensive renovation, the building complex will also accommodate a hotel. The value of the contract is approximately EUR 4.8 million.

"This project requires reliable partners. Caverion has already demonstrated its expertise and trustworthiness in numerous other major projects," says **Thorsten Erdmann**, Managing Director of the engineering company T. Erdmann, which did the planning of the building systems.

The four-storey building has a gross floor area of 24,600 m². The lower floors will be used for sales and storage rooms. In the upper two floors, a hotel with 152 rooms is being built. Caverion installs 1,720 sprinklers, among other things. The ventilation system has an output of 86,000 m³/h. The refrigerating machine operates with 503 kW.

The contractor is the Devello AG, which belongs to Caverion's "Real Estate Investors and Developers" client segment. Caverion's delivery will be completed in June 2018.
