### **Caverion to deliver building service systems to the Milaneo building complex to be built in Stuttgart, Germany**

Caverion Deutschland GmbH signed an agreement on the delivery of building services systems to the new Milaneo building complex to be built on the Mailänder Platz in Stuttgart, Germany. Work started in August and is scheduled to be completed in June 2015.

Caverion will deliver modern ventilation and air conditioning systems and smoke extractor equipment to the approximately 43,000 m<sup>2</sup> shopping centre to be built in the complex. The ventilation system will circulate nearly a million m<sup>3</sup> of air per hour in the shop and storage areas and more than 600,000 m<sup>3</sup> in the parking garage with room for approximately 1,700 vehicles.

More than 400 apartments, over 7,000 m<sup>2</sup> of office space and a hotel with 165 rooms will be built on the roof of the three-storey shopping centre. Caverion will deliver the ventilation and air conditioning systems, heating and cooling systems as well as all plumbing and piping for the facilities.

The building services systems and equipment provided by Caverion are energy-efficient and ensure low energy consumption, which is a key factor in sustainable construction. The German Sustainable Building Council (Deutsche Gesellschaft für Nachhaltiges Bauen, DGNB) awarded the building with a gold precertificate even before construction began.
